EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Martha Munchhof on May 24, 2004.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-10, drawn to a chemical compound and composition of formula (I).

Group II: Claims 12-15, drawn to a method of treating a disorder in which the regulation of monoamine transporter function is implicated by using a compound of formula (I).

Inventions I-II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product. See the multiple disorders of claim 13.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Ms. Martha Munchhof on May 24, 2004 a provisional election was made *without* traverse to prosecute the invention of Group I, claims 1-5 and 10. Claims 12-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
5. The application has been amended as follows:

Claims 12-15 have been canceled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

6. Applicants preserve the right to file divisional applications drawn to the non-elected subject matter of claims 12-15.
7. The prior art references have been considered. The references alone or in combination form do not teach nor suggest structurally similar compounds as those instantly claimed. The prior art does not teach the substitution by the radical -X in combination with the substitution by the radical $-\text{CH}_2 \text{NR}^1\text{R}^2$ on a ring such as A nor would the modification be suggested to one of ordinary skill in the art.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
